

RAPID FIRE POSTER PRESENTATIONS

Zoom Room 1: Moderated by Patrick Habecker, University of Nebraska-Lincoln

1. Self-Help Group Attendance-Associated Treatment Outcomes Among Individuals With Substance Use Disorder in Short-Term Residential, **Rowida Mohamed, West Virginia University**
2. Effects of HRSA Rural Status on Opioid Poisoning in Medically Underserved Rural Areas of South Dakota, **Ahmed Nahian, Center for Brain and Behavior Research, University of South Dakota**
3. Rural opioid use during pregnancy; an educational intervention, **Robin Humrich, University of Nebraska Medical Center**
4. Factors that Influence Self-Report of Substance Abuse Among American Indians with an Addiction, **Sierra Beckner, University of Nebraska Medical Center CON-Lincoln Division**
5. Differences Between Violent and Non-Violent Offenders in a Sample of Justice-Involved Women with Opioid Use Disorder, **Mary Levi, University of Kentucky**
6. Rural-Urban Differences in Substance Use and MOUD Treatment Among Justice-Involved Women with Opioid Use Disorders, **Jaxin Annett, University of Kentucky**
7. Trait mindfulness moderates the relationship between cannabis consequences and cannabis-related Snapchats among college students, **Patrick Duryea, Department of Psychology, University of Nebraska-Lincoln**
8. Tattoos and their role in the healing process, **Halie Adam, University of South Dakota**

Zoom Room 2: Moderated by Amanda Rodriguez, Texas Tech Health Sciences Center El Paso

1. Recreational Cannabis Polysubstance Users Exhibit Alterations In Neural Oscillatory Dynamics Serving Visuospatial Processing, **Lucas Weyrich, Institute for Human Neuroscience, Boys Town National Research Hospital"**
2. The role of reward-enhancement in nicotine self-administration by female Sprague-Dawley rats, **Kathleen McNealy, University of Nebraska-Lincoln**
3. Melanin-concentrating hormone receptor antagonism attenuates nicotine sensitization differentially between female and male rats, **Isabel Kuebler, University of Nebraska-Lincoln**
4. Alcohol drinking in male rats is differently modulated by type of sugar added: regulation by melanin-concentrating hormone, **Gerin Zimmerman, University of Nebraska-Lincoln**
5. Investigating reward enhancement by cotinine, a nicotine metabolite, alone and co-administered with varenicline, **Sydney Houser, University of Nebraska-Lincoln**
6. Sex differences in chronic methamphetamine use, reinstatement, and ibudilast treatment in rats, **MacKenzie Knabel, University of Nebraska-Lincoln**
7. Determination of Fentanyl and Sufentanil's Dose-Effect Relationship to Morphine in Discriminated Goal Tracking Task, **Matthew Tracy, University of Nebraska-Lincoln**
8. Cannabis modulates the motor oscillatory dynamics serving cognitive control in PWH, **Lauren Webert, Institute for Human Neuroscience, Boys Town National Research Hospital, College of Medicine, Creighton University**

Zoom Room 3: Moderated by Eric Garcia, University of Nebraska-Lincoln

1. Changes in Predictors of Young Adult Alcohol Use: A Natural Experiment during COVID-19, **Heather Kissel, Northern Kentucky University**
2. The Risk of Infective Endocarditis among COVID-19 Patients with Non-Medical Opioid Use R. **Constance Wiener, West Virginia University**
3. Coping Tools for Pandemic-related Stress in a Midwestern State, **Marie Severson,**

University of South Dakota

4. Scaffolded Inclusion of Local Peer Recovery Coach Model Into Care Coordination Program for Mothers and their Infants, **Lesley Cottrell, West Virginia University**
5. Impacts of COVID-19 Infection and Substance Use Disorder on the Health of Mothers and Infants, **Twisha Shah, West Virginia School of Medicine**
6. Intimate Partner Violence and Subsequent Substance Use in women exposed to it: An analysis, **Kriti, Sinha, Amity Institute of Psychology and Allied Sciences**
7. Parental Substance Use: The Link Between Child Custody Case Outcomes and Trauma History, **Sydney Parker, West Virginia University**
8. Stress differentially predicts sexualized substance use in heterosexual, mostly heterosexual, and bisexual women, **Tierney Lorenz UNL Psychology, Behavioral Neuropharmacology Lab**
